

## *Making Things Happen: Restore Center for Aesthetics Proudly Offers Restoring Beauty and Grace*

**D**r. Bana Mashnoug understands how much confidence and aging gracefully can be to a person. She's made it her business to build a client-centric care facility offering safe cosmetic and medical services in downtown Munster.

"We are very proud to offer high-quality skincare, using leading-edge technology and medical expertise, in a welcoming and non-judgmental environment," said Bana Mashnoug. "Growing older is something that everyone experiences, and it is ok, but why not do it gracefully and confidently."

Bana is promoting graceful aging while using the best technology and the latest treatments available in an elegant and non-threatening environment.

Some of Restore's most profound treatments include HydraFacial, a non-invasive skin exfoliating treatment, skin resurfacing, which is an advanced technique to change the appearance or texture of skin, Botox/fillers, PDO threads, which are one of the safest implants to improve the quality of the skin, redefine face contour, reduce roundness and wrinkles and lift sagging skin in the cheeks, jowls, and neck.

"Our practice is proud to offer so many treatments that enhance the restoration of beauty and grace," said Dr. Bana. "Aging takes a toll on a person, and it goes far beyond vanity."

Jagoda Lucas, of Schererville, praises Dr. Bana's helpful and non-judgmental consultations. She said she has referred at least five to six patients to Restore Center of Aesthetics and feels great when friends come back and thank her for sending them to Dr. Bana.

"I absolutely love Dr. Bana and her honest disposition," said Lucas. "I find our conversations to be very enlightening and helpful. She really listens to her clients and offers a subtle approach that is very empowering and positive."

Lucas said she "absolutely loves" the HydraFacials because it instantly rejuvenates the skin and she is thoroughly impressed with how noticeable the feedback is following the treatment.

"To be candid, we live in an age of social media, which means photos and videos are everywhere," said Lucas. "When you look good, naturally, you are going to feel good. It's very important to people, especially women, to feel good about their appearance and age gracefully. Dr. Bana and [Restore Center for Aesthetics] provide that opportunity, and I am so grateful to them."

Above, Dr. Bana Mashnoug offers safe cosmetic and medical service at Restore Center for Aesthetics. Dr. Bana has been nominated for 2021 Influential Woman of the Year.
